OSB Shear Beam Load Cells

Key Features:

- Capacities 0-250kg up to 0-5000kg
- Output: 2mV/V
- Sealed to IP67 or IP68
- High Accuracy: $<\pm 0.03\%$ /Rated Capacity
- Robust Construction
- Sense Wire Facility
- Optional Mounting Accessories
- 3 Year Warranty

For Medium Capacity Weighing Applications

The OSB single-ended shear beam load cells are designed for medium capacity weighing applications such as hoppers and vessels, where a low profile, highly accurate and high environmental sealing is required. Their high environmental sealing means they are sealed against ingress of liquids and the polyurethane shielded cable enables it to function in harsh environments whilst still maintaining its integrity.

There are 2 versions available:

- OSBST Shear Beam - Made from stainless steel and sealed to IP68, ideal for conveyor weighing applications such as food, pharmaceutical, and brewing industry, or any application where the load cell needs to be washed down for hygienic purposes.
- OSBKT Shear Beam – Made from alloy steel and sealed to IP67, ideal for general purpose industrial weighing applications where cost is an important factor.

Two mounting assemblies are available to suit the OSB series of shear beam load cells:

- The Vessel Mount - for static applications.
- The Shock / Anti-Vibration Mount - for mixer, feed hopper and conveyor applications where vibration or transient loads may occur.

Sense wires feedback the voltage reaching the load cell, this allows any changes in the lead resistance due to temperature change and/or cable extension to be compensated for when used with instrumentation that features a ratiometric input, such as our [Intuitive2-L digital panel meter](#).

Options:

- Alternative Cable Lengths
- Full Range of Mounting Options Available:
Inc. Vessel/Tank Mounting, Shock/Anti-Vibration Mounting Assembly, Platform Mounting Assembly, Load Button, Base Mounting Spacer, Spherical Rod-End Bearings
- ATEX Certification: II 1 GD Ex ia IIC T6
- Can be Supplied as a Complete System With Mounts, a Junction Box and Instrumentation.
- USB Version (via DSC-USB)
- Wireless Version (via T24 Instrumentation)
- Single or Multi-Channel PC-Based Monitoring & Data Logging System.
- TEDS (Transducer Electronic Data Sheet)
- TEDS Allows Plug & Play with TEDS Enabled Instrumentation.

Applications:

- Low Profile Platforms
- Hoppers and Vessels
- Weighing and Packing Machines
- Conversion of Mechanical Scales
- Food Industry
- Pharmaceutical Applications
- Brewing Applications

Mounting Accessories:

VESSEL MOUNT ASSEMBLY

- Simple to Install Into New or Existing Installations.
- Can be Installed With or Without the Load Cells in Position
- Stainless Steel Construction
- Easy Lifting and Removal of Load Cell
- Rugged Construction
- Reduces Installation Time
- Permanent Integral Safety Vessel Jacking System for your Vessel
- Anti-Lift Mechanism for Greater Vessel Stability
- Maximum Safety Protection from the Effects of Wind or Accidental Collision are Built-In.
- Heavy Duty Earth Straps Ensure that no Potential Difference Between the Upper and Lower Plates Occurs.
- Low Resistance Path Assists in Removing Strong Welding Currents.
- Substantial Protection Plate is Positioned Above the Cable Outlet to Prevent Damage by Falling Objects or Misuse.
